

I am writing in response to the possibility of LPFM taking over the current FM service. I used to be an avid listener of K-LOVE (Danville, VA 106.7), a nationwide, Christian, commercial-free radio station based in California, and while I no longer live in an area where K-LOVE can be heard, it would grieve me very much to hear that there is no longer service in some areas. I strongly believe that K-LOVE serves a genuinely vital role in the communities where it reaches, reaching out to people with positive music that other stations do not play. There was no other radio station that I listened to when I lived in Danville, and I truly believe that there are many other people who feel the same way. It would be detrimental to too many areas to allow the LPFM take effect, and I urge you to not implement this system.  
Thank you for your time!  
Christina Kleinfelter
